ABSTRACT SUBMISSION GUIDELINES

Note- The abstract submission is **mandatory** for participation in DroidRush 2018. This step **marks teams registration** as well.

In the abstract document, you have to provide :

1. Team information.
2. A small description of the problem statement you're working on (Maybe some special name you have thought for your app :P).
3. The process flow of your app i.e. how your app is going to tackle the problem and its phases.
4. The features you have thought of implementing.
5. The design - visual UI of your app, which you can make by hand or by any tools available online. You can also add your screenshot of your app if you have completed some part of it. (Can be on pen paper too !)
6. External libraries/APIs used/planning to use (if any).
7. **We also remind you that the teams from 3rd year must also include class diagrams in their abstracts.**
8. Keep the abstract short and precise. We only need the useful information.
9. Since an abstract is a way of defining your ideas in a short and precise manner, ensure you make an effective one. The abstract also has some weightage in DroidRush 2018.
10. We only need a rough estimate of what you are planning to do and which features you are planning to implement. You can add or delete the features later on as per your wish.

You are required to submit the Abstract in a pdf format.
Filename : "TEAM NAME_YEAR_BTECH/MCA" (for e.g.TEAM3 _3rd_btech)
Email Id : droidrush.cyberquest2k18@gmail.com
Subject : " ABSTRACT SUBMISSION TEAM NAME "

All the best :-)
